

The implementation partners of the Pathfinder Initiative are happy to announce the following free Buenos Aires event:

LAC NGO Assembly on Internet Governance

The LAC NGO Assembly on Internet Governance brings together NGOs, Civil Society and other Internet governance stakeholder groups in order to raise awareness and organizational capacity with regard to the Internet related issues they face. The goal of the meeting is to raise understanding of strategic Internet issues that affect us all, and to promote organizational voices in areas of Internet policy formation and implementation relevant to their work and their mission. The NGO Assembly engages with all sectors and with a large variety of speakers, and does not limit itself to Civil Society. Today's Internet stakeholders have to rely for their growth and development on co-operation and partnership with a multitude of other highly diverse organizations and sectors. The NGO Assembly is designed to produce win-win policies and practice strategic outcomes.
